EAST WEST PETROLEUM CORP.

CONSOLIDATED FINANCIAL STATEMENTS
FOR THE TWELVE MONTHS ENDED
MARCH 31, 2015
AND THE FIFTEEN MONTHS ENDED
MARCH 31, 2014

(Expressed in Canadian Dollars)

INDEPENDENT AUDITORS' REPORT

To the Shareholders of
East West Petroleum Corp.

We have audited the accompanying consolidated financial statements of East West Petroleum Corp., which comprise the consolidated statements of financial position as at March 31, 2015 and 2014 and the consolidated statements of comprehensive loss, changes in equity and cash flows for the twelve months ended March 31, 2015 and the fifteen months ended March 31, 2014, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of East West Petroleum Corp. as at March 31, 2015 and its financial performance and its cash flows for the twelve months ended March 31, 2015 and the fifteen months ended March 31, 2014 in accordance with International Financial Reporting Standards.

Supplemental cash flow information - See Note 17

The accompanying notes are an integral part of these consolidated financial statements.

1. Nature of Operations

East West Petroleum Corp. (the "Company") was incorporated on October 23, 1987 under the provisions of the Company Act (British Columbia) and its major activity is the development and exploration of international oil and gas properties. The Company is listed and trades on the TSX Venture Exchange ("TSXV") under the symbol "EW". In November 2013 the Company changed its fiscal year-end from December 31 to March 31. Accordingly, the Company's 2014 fiscal year consists of fifteen months and the 2015 fiscal year consists of twelve months. The Company's principal office is located at #1210 - 1095 West Pender Street, Vancouver, British Columbia V6E 2M6 Canada.

The Company has most recently focused the majority of its capital resources on the exploration and development of its oil and gas interests in the Taranaki Basin, New Zealand. On January 7, 2014 a commercial discovery was declared on location PEP 54877. This decision was based on a number of factors including, amongst others, placement of the well on permanent production, stabilized production and indication that these results will continue. For accounting purposes the Company commenced recognizing earnings effective January 7, 2014.

The Company is in the process of exploring, developing and producing from its oil and gas properties and has two oil and gas properties that contain reserves that are economically recoverable. The success of the Company's exploration and development of its oil and gas properties requires significant additional exploration and development activities to establish additional proved reserves and to commercialize its oil and gas exploration properties. The Company is also influenced by significant financial risks as well as commodity prices. In addition, the Company will use cash and operating cash flow to further explore and develop its properties towards planned principal operations. The Company monitors its cash and cash equivalents and adjusts its expenditure plans to conform to available funding. The Company plans to fund exploration and development activities through existing cash resources.

2. Change in Functional Currency

Until January 7, 2014 the functional currency of the Company's wholly-owned New Zealand subsidiary, East West Petroleum (NZ) Limited ("EWNZ"), was the Canadian dollar. On January 7, 2014 a commercial discovery was declared on certain of EWNZ's oil and gas properties. Although oil sales are denominated in United States dollars, the New Zealand dollar is the currency that mainly influences labour, materials and other costs of providing oil and natural gas. Accordingly, EWNZ changed prospectively its functional currency from the Canadian dollar to the New Zealand dollar.

Effective January 7, 2014 assets and liabilities of EWNZ are therefore translated into Canadian dollars using the report date closing exchange rate. Income and expenses are translated into Canadian dollars at the average exchange rate over the reporting period. Exchange differences are presented in other comprehensive loss and recognized in the foreign currency translation reserve.

3. Basis of Preparation

Statement of Compliance

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations of the IFRS Interpretations Committee ("IFRIC").

Basis of Presentation

These consolidated financial statements are presented for a period of twelve months ended March 31, 2015 ("fiscal 2015") and fifteen months ended March 31, 2014 ("fiscal 2014"). The Company had changed its fiscal year end from December 31st to March 31st effective March 31, 2014. The change in the fiscal year was made for the purpose of streamlining the Company's financial reporting.

3. Basis of Preparation (continued)

These consolidated financial statements have been prepared on a historical cost basis except for certain financial instruments which are measured at fair value. The consolidated financial statements are presented in Canadian dollars unless otherwise stated.

Significant Accounting Estimates

The preparation of the consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses and the disclosure of contingencies. Such estimates primarily relate to unsettled transactions and events as of the date of the consolidated financial statements. These estimates are subject to measurement uncertainty. Actual results could differ from and affect the results reported in these consolidated financial statements. Significant judgments, estimates and assumptions made by management in the preparation of these financial statements are described below:

(i) Fair values of petroleum and natural gas properties, depletion and depreciation and amounts used in impairment calculations are based on estimates of crude oil and natural gas reserves, oil and gas prices and future costs required to develop those reserves. By their nature, estimates of reserves and the related future cash flows are subject to measurement uncertainty, and the impact of differences between actual and estimated amounts on the consolidated financial statements of future periods could be material.

(ii) Petroleum and natural gas properties, exploration and evaluation assets and other corporate assets are aggregated into cash-generating-units ("CGUs") based on their ability to generate largely independent cash flows and are used for impairment testing. The determination of the Company's CGUs is subject to management's judgment.

(iii) The decision to transfer exploration and evaluation assets to property, plant and equipment is based on management's determination of an area's technical feasibility and commercial viability based partially on proved and probable reserves.

(iv) The calculation of decommissioning liabilities includes estimates of the future costs to settle the liability, the timing of the cash flows to settle the liability, the risk-free rate and the future inflation rates. The impact of differences between actual and estimated costs, timing and inflation on the consolidated financial statements of future periods may be material.

(v) The estimated fair value of the Company's financial assets and liabilities, are by their nature, subject to measurement uncertainty.

(vi) The calculation of income taxes requires judgment in applying tax laws and regulations, estimating the timing of the reversals of temporary differences, and estimating the realizability of deferred tax assets. These estimates impact current and deferred income tax assets and liabilities, and current and deferred income tax expense (recovery).

(vii) The calculation of share-based compensation requires estimates of volatility, forfeiture rates and market prices surrounding the issuance of share options. These estimates impact share-based compensation expense and share-based compensation reserve.

(viii) The determination of a subsidiary's functional currency often requires significant judgment where the primary economic environment in which they operate may not be clear. This can have a significant impact on the consolidated results of the Company based on the foreign currency translation methods used.

(ix) Contingencies are resolved only when one or more events transpire. As a result, the assessment of contingencies inherently involves estimating the outcome of future events.

3. Basis of Preparation (continued)

Details of the Group

In addition to the Company, the consolidated financial statements include all subsidiaries. Subsidiaries are all corporations over which the Company is able, directly or indirectly, to control financial and operating policies, which is the authority usually connected with holding majority voting rights. Subsidiaries are fully consolidated from the date on which control is acquired by the Company. Inter-company transactions and balances are eliminated upon consolidation. They are de-consolidated from the date that control by the Company ceases.

4. Summary of Significant Accounting Policies

Cash and Cash Equivalents

Cash includes cash on hand and demand deposits. Cash equivalents include short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value. The Company is not exposed to significant credit or interest rate risk although cash is held in excess of federally insured limits with a major financial institution. The Company did not have any cash equivalents as at March 31, 2015 and 2014.

Amounts Receivable

Receivables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method, less provision for impairment. Receivables are classified as loans and receivables. A provision for impairment of receivables is established when there is objective evidence that the Company will not be able to collect all amounts due according to the original terms of the receivables.

Accounts Payable and Accrued Liabilities

Payables are obligations to pay for materials or services that have been acquired in the ordinary course of business from suppliers. Payables are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current liabilities.

Payables are classified as other financial liabilities initially at fair value and subsequently measured at amortized cost using the effective interest method.

Exploration and Evaluation Expenditures

Pre-license costs are recognized in the statement of comprehensive loss as incurred. Exploration and evaluation expenditures directly attributable to the exploration for petroleum and natural gas reserves are capitalized as exploration and evaluation assets on a field-by-field basis. These costs include, but are not limited to: lease acquisition either directly or by business combination, lease rentals on undeveloped properties, acquisition of rights to explore, geological, and geophysical costs, exploratory drilling of both productive and unproductive wells and overhead charges. No depletion or amortization is charged during the exploration and evaluation phase.

Exploration and evaluation expenditures are capitalized until reserves are evaluated and determined to be commercially viable and technically feasible. If reserves are not identified, these costs are expensed. The balance of exploration and evaluation expenditures is carried forward as an exploration and evaluation asset in the statement of financial position where the resource rights are current and it is considered probable that costs will be recovered through the future development or sale of the property.

If it is determined that a commercial discovery of reserves will not be achieved, the capitalized exploration and evaluation assets are written down to their recoverable amounts. Where commercial discovery of reserves has been made, the exploration and evaluation assets are tested for impairment and transferred to property, plant and equipment as petroleum and natural gas properties.

4. Summary of Significant Accounting Policies (continued)

Property, Plant and Equipment

Property, plant and equipment are carried at cost, less accumulated depreciation and accumulated impairment losses.

The cost of an item of property, plant and equipment consists of the purchase price, any costs directly attributable to bringing the asset to the location and condition necessary for its intended use and an initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located. The purchase price or construction cost is the aggregate amount paid and the fair value of any other consideration given to acquire the asset.

Where commercial production in an area has commenced, petroleum and natural gas properties are depreciated on a unit-of-production basis over the proved and probable reserves of the field concerned, except in the case of assets whose useful life is shorter than the lifetime of the field, in which case the straight-line method is applied. The unit-of-production rate for the amortization of field development costs takes into account expenditures incurred to date, plus future development expenditures to develop the proved and probable reserves. Changes in factors such as estimates of proved reserves that affect unit-of-production calculations do not give rise to prior year financial period adjustments and are accounted for on a prospective basis.

Office equipment and leasehold improvements are depreciated annually on a straight-line basis over the estimated useful life of the assets, at a rate of between 20% and 30% commencing when the related asset is available for use.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on disposal of the asset, determined as the difference between the net disposal proceeds and the carrying amount of the asset, is recognized in profit or loss in the consolidated statement of comprehensive income or loss.

Where an item of plant and equipment comprises major components with different useful lives, the components are accounted for as separate items of plant and equipment. Expenditures incurred to replace a component of an item of plant and equipment that is accounted for separately, including major inspection and overhaul expenditures are capitalized.

Joint Operations

A portion of the Company's operations are conducted jointly with others and, accordingly, these consolidated financial statements reflect only the Company's proportionate interest in such activities.

Impairment of Assets

Non-Financial Assets

The Company reviews the carrying amounts of its non-financial assets, other than exploration and evaluation assets and deferred tax assets, at each reporting date to determine whether there is any indication of impairment. If such indication exists, then the asset's recoverable amount is estimated. For goodwill and other intangible assets that have indefinite lives or that are not yet available for use, an impairment test is completed annually. Exploration and evaluation assets are tested for impairment when reclassified to property, plant and equipment as petroleum and natural gas properties, and also if facts and circumstances suggest that the carrying value exceeds the recoverable amount.

For the purpose of impairment testing, assets are grouped together into the lowest level at which there is identifiable cash flows that are largely independent of the cash flows of other groups of assets, known as a cash-generating unit ("CGU"). Exploration and evaluation assets are grouped on an area basis for impairment assessment purposes. The goodwill acquired in a business combination, for the purposes of impairment testing, is allocated to the CGU's that are expected to benefit from the synergies of the combination.

4. Summary of Significant Accounting Policies (continued)

An impairment loss is recognized if the asset or CGU's carrying amount exceeds its recoverable amount determined as the higher of: its fair value less costs to sell, and its value in use. In assessing value in use, the estimated future after-tax cash flows are adjusted for the risks specific to the asset group and are discounted to present value using a discount rate that reflects current market assessments of the time value of money. Fair value less costs to sell is based on discounted cash flow forecasts using market assumptions, including market assessment of reserves, future prices and a risk-adjusted discount rate appropriate to the asset by reference to general market conditions, market expectations of current and future development, and the costs of future development. Impairment losses are recognized in the statement of operations and comprehensive loss.

For other assets, impairment losses recognized in prior years are assessed at each reporting date for indications that previously recognized impairment losses may no longer exist or may have decreased. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. The impairment loss is reversed only to the extent that the asset's or CGU's carrying amount does not exceed the carrying amount that would have been determined, net of depletion, had no impairment loss been recognized in prior years. An impairment loss in respect of goodwill is not reversed.

Financial Assets

Financial assets are assessed for impairment at each reporting date to determine whether there is any objective evidence that they are impaired. Objective evidence indicates that one or more events have had a negative effect on the estimated future cash flows of the asset and will not be realized. For loans and receivables, the amount of impairment is the difference between the asset's carrying amount and the present value of the estimated future cash flows, discounted at the original effective interest rate.

If there is impairment, the carrying amount of the financial asset is reduced by the impairment loss, except for trade receivables where the carrying amount is reduced through the use of an allowance account, and the loss is recognized in the statement of operations and comprehensive loss. When a trade receivable is uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the statement of operations and comprehensive loss

Decommissioning Liabilities

Liabilities for decommissioning costs are recognized when the Company has an obligation to dismantle or remove a facility and to restore the site on which it is located, and when a reliable estimate of that liability can be made. Cost is estimated upon current regulation and technology. Normally an obligation arises for a new facility or well during the construction or installation phase. Obligations may also be created through a change in legislation. The amount recognized is the fair value of the estimated future cost determined in accordance with local conditions and requirements.

Fair value is determined using the present value of the estimated future cash outflows to abandon the asset and restore the site, discounted using a pre-tax risk-free rate. Costs and the discount rate are updated at each reporting date to reflect current market assessments of the time value of money. The provision is reviewed regularly by the Company's management based on current regulations, costs, technologies and industry standards.

The corresponding amount is capitalized to petroleum and natural gas assets and is amortized on a unit-of-production basis as part of depletion and depreciation. Any adjustments arising from the reassessment of estimated costs or the current estimate of the discount rate used are reflected as an adjustment to the cost of petroleum and natural gas assets. The unwinding of the discount is recognized as a finance cost in income. Actual restoration expenditures are charged as reductions to the accumulated provision when incurred.

4. Summary of Significant Accounting Policies (continued)

Provisions

Provisions are recognized when the Company has a present obligation as a result of a past event, it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The provisions are measured at management's best estimate of the expenditure required to settle the obligation at the reporting date, and are discounted to present value where the effect of time is material.

Financial Instruments

All financial assets are initially recorded at fair value and designated upon inception into one of the following four categories: held to maturity, available-for-sale, loans and receivables or at fair value through profit or loss ("FVTPL").

Financial assets classified as FVTPL are measured at fair value with unrealized gains and losses recognized through comprehensive loss. Cash is classified as FVTPL.

Financial assets classified as loans and receivables and held to maturity are measured at amortized cost. Amounts and advances receivable are classified as loans and receivables.

Financial assets classified as available-for-sale are measured at fair value with unrealized gains and losses recognized in other comprehensive income (loss) except for losses in value that are considered other than temporary. Investments in common shares are classified as available-for-sale.

Transaction costs associated with FVTPL are expensed as incurred, while transaction costs associated with all other financial assets are included in the initial carrying amount of the asset.

All financial liabilities are initially recorded at fair value and designated upon inception as FVTPL or other financial liabilities.

Financial liabilities classified as other financial liabilities are measured at amortized cost. Accounts payable and accrued liabilities and due to joint venture partner are classified as other financial liabilities.

Financial liabilities classified as FVTPL are measured at fair value with unrealized gains and losses recognized through comprehensive loss. At March 31, 2015 and 2014 the Company has not classified any financial liabilities as FVTPL.

Share Capital

Common shares issued by the Company are classified as equity. Costs directly attributable to the issue of common shares, share purchase warrants and share options are recognized as a deduction from equity, net of any related income tax effects.

Share-Based Compensation Transactions

The share option plan allows Company employees and consultants to acquire shares of the Company. The fair value of share options granted is recognized as a share-based compensation expense with a corresponding increase in the equity settled share-based payments reserve in equity. An individual is classified as an employee when the individual is an employee for legal or tax purposes (direct employee) or provides services similar to those performed by a direct employee.

For employees the fair value is measured at grant date and each tranche is recognized separately on a straight line basis over the period during which the share options vest. The fair value of the share options granted is measured using the Black-Scholes option pricing model taking into account the terms and conditions upon which the share options were granted. At the end of each reporting period, the amount recognized as an expense is adjusted to reflect the actual number of share options that are expected to vest.

4. Summary of Significant Accounting Policies (continued)

Equity-settled share-based compensation transactions with non-employees are measured at the fair value of the goods or services received. However, if the fair value cannot be estimated reliably, the share-based compensation transaction is measured at the fair value of the equity instruments granted at the date the Company receives the goods or the services.

Contingencies

When a contingency is substantiated by confirming events, can be reliably measured and will likely result in an economic outflow, a liability is recognized in the consolidated financial statements as the best estimate required to settle the obligation. A contingent liability is disclosed where the existence of an obligation will only be confirmed by future events, or where the amount of a present obligation cannot be measured reliably or will likely not result in an economic outflow. Contingent assets are only disclosed when the inflow of economic benefits is probable. When the economic benefit becomes virtually certain, the asset is no longer contingent and is recognized in the consolidated financial statements.

Current and Deferred Income Tax

Income tax expense comprises current and deferred tax. Income tax is recognized separately in the statement of comprehensive loss, except to the extent that it relates to items recognized in other comprehensive loss or directly in equity. In this case the income tax is also recognized in other comprehensive loss or directly in equity, respectively.

Current Income Tax

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the statement of financial position date in the countries where the Company's subsidiaries and associates operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred Income Tax

Deferred income tax is recognized, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the statement of financial position date and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred income tax relating to items recognized directly in equity or other comprehensive income ("OCI") is recognized in equity or OCI and not in the statement of comprehensive loss.

Deferred income tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries, except where the timing of the reversal of the temporary difference is controlled by the Company and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes assets and liabilities relate to income taxes levied by the same taxation authority on either the taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

4. Summary of Significant Accounting Policies (continued)

Earnings (Loss) Per Share

Basic earnings (loss) per share is computed by dividing income (loss) attributable to common shareholders by the weighted average number of common shares outstanding during the period. The computation of diluted earnings (loss) per share assumes the conversion, exercise or contingent issuance of securities only when such conversion, exercise or issuance would have a dilutive effect on loss per share. The dilutive effect of convertible securities is reflected in diluted earnings per share by application of the "if converted" method. The dilutive effect of outstanding options and warrants and their equivalents is reflected in diluted earnings (loss) per share, when diluted earnings (loss) per share is presented.

Revenue Recognition

Revenue is recognized when it is probable that the economic benefits will flow to the Company and delivery has occurred, the sale price is fixed or determinable, and collectability is reasonably assured. These criteria are generally met at the time the product is shipped and delivered to the customer and, depending on the delivery conditions, title and risk have passed to the customer and acceptance of the product, when contractually required, has been obtained. Revenue is measured based on the sales contract.

Foreign Currency Translation

Functional and Presentation Currency

Items included in the financial statements of each of the Company's entities are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The Company's entities' functional currencies are the Canadian dollar and the New Zealand dollar. The consolidated financial statements are presented in Canadian dollars which is the Company's presentation currency.

(i) EWNZ

EWNZ has the New Zealand dollar as the functional currency. Assets and liabilities of EWNZ are therefore translated into Canadian dollars using the report date closing exchange rate. Income and expenses are translated into Canadian dollars at the average exchange rate over the reporting period. Exchange differences are presented in other comprehensive loss and recognized in the foreign currency translation reserve. See also Note 2.

(ii) Other Subsidiaries

The financial statements of each of the Company's other subsidiaries are prepared in the local currency of their home jurisdictions. Consolidation of each subsidiary includes re-measurement from the local currency to the subsidiary's functional currency. Each subsidiary's functional currency and the functional currency of the parent, being the currency of the primary economic environment in which the subsidiary and the parent operates, is the Canadian dollar.

Foreign Currency Transactions

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing on the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at period-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in comprehensive loss.

Comparative Figures

Certain of the prior fiscal year's comparative figures have been reclassified to conform with the current fiscal year's presentation.

4. Summary of Significant Accounting Policies (continued)

Accounting Standards and Interpretations Issued but Not Yet Adopted

As at the date of these financial statements, the following standard has not been applied in these financial statements:

(i) IFRS 9 *Financial Instruments*; tentatively effective for annual periods beginning on or after January 1, 2018. IFRS 9 replaces the multiple classification and measurement models in IAS 39 with a single model that has only two classification categories: amortized cost and fair value. IFRS 9 prohibits reclassifications except in rare circumstances when the entity's business model changes. The new standard removes the requirement to separate embedded derivatives from financial asset hosts. It requires a hybrid contract to be classified in its entirety at either amortized cost or fair value.

Management is currently assessing the impact of this new standard on the Company's accounting policies and financial statement presentation.

5. Amounts Receivable

	March 31, 2015 $	March 31, 2014 $
Production receivable	714,729	1,563,562
Other	39,541	309,052
	754,270	1,872,614

6. Advances Receivable

On March 6, 2015 the Company entered into a letter of intent (the "LOI") with Frontier Natural Resources Inc. ("Frontier") whereby it agreed to provide Frontier a credit facility of US $250,000 (the "Credit Facility"). The LOI contemplates the negotiation of a definitive credit agreement and the exploration of a potential acquisition of 100% of the capital of Frontier. As at March 31, 2015 the Company had advanced US $165,000 and the remaining US $85,000 was advanced in April 2015.

Advances under the Credit Facility bear interest at 3% per annum, payable monthly, and are scheduled to mature on December 31, 2015 unless mutually extended by both parties. The Company will also have the option to convert the advances into Class A Preferred Shares of Frontier at a conversion price of US $0.20 per share. Frontier also agreed to issue a bonus of 250,000 Class B Preferred Shares of Frontier ("Frontier B Preferred Shares") to the Company. The Frontier B Preferred Shares were issued to the Company in June 2015.

Frontier is a privately held oil and natural gas company incorporated in Pennsylvania, U.S.A. in 2014. A director of the Company is also a shareholder and director of Frontier.

The conversion feature is considered an embedded derivative. However, the Company is unable to reliably measure its fair value. Therefore, the fair value of the host advances receivable was determined with any residual against the fair value of the combined hybrid instrument allocated to the embedded derivative. The value of the embedded derivative was immaterial.

7. Investment

During fiscal 2012 the Company purchased 5,000,000 common shares of North American Oil and Gas Corp. (the "NAMG Shares") for $498,500 (US $500,000). See also Note 8(c).

As at March 31, 2014 the Company recorded its investment in the NAMG Shares at a fair value of $718,445. During fiscal 2014 the Company recorded a net unrealized comprehensive loss of $2,985,390, net of deferred income tax recovery of $425,000.

During fiscal 2015 the Company recorded a net unrealized comprehensive loss of $194,945, net of deferred income tax recovery of $25,000 and sold the NAMG Shares for $200,253, recognizing a realized loss of $298,247.

(a) On December 11, 2012 the Government of New Zealand awarded the Company and its partner, TAG Oil Ltd. ("TAG"), interests in three onshore exploration blocks located in the Taranaki Basin, New Zealand. Under the terms of the agreements, the Company agreed to participate in the drilling of a minimum of nine exploration wells on Petroleum Exploration Permits ("PEP") 54876, 54877 and 54879. The Company could earn a 50% participation interest in PEP 54876 and PEP 54879 and a 30% participation interest in PEP 54877 by funding 100% ($2,500,000 each well - the "Initial Funding") of the initial well cost on PEP 54876, the first two wells on PEP 54877 and the initial well on PEP 54879. All subsequent costs on the wells are to be funded based on each company's participation interest. The Company is entitled to receive 100% of the oil and gas revenues, on a permit-by-permit basis, to recover its Initial Funding. TAG is the operator of the joint venture.

8. Exploration and Evaluation Assets (continued)

PEP 54876

In April 2014 the Company completed drilling on PEP 54876, the results of which confirmed that there were no commercial deposits as at March 31, 2014. During fiscal 2014 the Company recorded an impairment of $2,499,100 for costs incurred to March 31, 2014. During fiscal 2015 the Company recorded a further $2,732,060 for costs incurred subsequent to March 31, 2014 as a charge to general exploration.

PEP 54877

On January 7, 2014 commercial discovery was declared on PEP 54877 and the capitalized expenditures were transferred to property, plant and equipment.

PEP 54879

During fiscal 2015 the Company received net revenues of $44,972 from production from the testing of the G1 well on PEP 54879. No decision has been made on the commerciality of PEP 54879 and all net revenues have been recorded as a recovery against the capitalized costs.

(b) On December 5, 2013 the Government of New Zealand awarded the Company and its partner, TAG, an interest in an onshore exploration block located in the East Coast Basin, New Zealand. Under the terms of the agreement, the Company agreed to participate in the initial work program of seismic reprocessing, seismic data acquisition and drilling of one exploration well on PEP 55770. The Company could earn a 40% participation interest by funding costs up to a maximum of NZ $11.8 million. All subsequent costs would be funded based on each company's participation interest. In December 2014 the Company and TAG agreed to the termination of the Company's interest and the Company recorded an impairment of $63,357 for costs incurred.

(c) On August 29, 2012 the Company entered into a letter of intent with Lani, LLC ("Lani") and subsequently, on November 13, 2012, the Company entered into a farm-in agreement (collectively the "Lani Agreement") whereby it was assigned certain participation interests in Lani's petroleum and gas leases covering exploration properties in the San Joaquin Basin of California. Under the terms of the Lani Agreement the Company was assigned:

(i) 25% working interest in the Tejon Ranch Extension. The Company funded 100% of the working interest costs associated with the drilling and completing of one exploration well on the Tejon Ranch Extension leases, for an amount of US $1,300,000;

(ii) an initial 21.25% working interest in the Tejon Main Area. On August 1, 2013 the Company entered into a purchase and sale agreement with Solimar Energy Limited ("Solimar") a party at arms-length to the Company, whereby the Company paid US $110,000 to Solimar to acquire an additional 28.75% working interest to increase the Company's working interest to 50%. The Company was required to fund 71.25% of the working interest costs associated with the drilling and completing one exploration well on the Tejon Main Area leases, up to a maximum of US $926,250; and

(iii) 50% working interest in leases in the White Wolf. The Company was required to fund US $347,500 to Lani to be used for lease delay rental payments and for leasing new acreage in White Wolf.

On November 20, 2012 Lani and NAMG entered into an agreement and plan of merger whereby NAMG acquired 100% of Lani. In conjunction with the terms of the Lani Agreement the Company made an investment of US $500,000 in NAMG as part of Lani's restructuring. See also Note 7.

During fiscal 2014 the Company determined that the exploration well drilled on the Tejon Ranch Extension was unlikely to be commercial and recorded an impairment charge of $1,463,111 for all costs incurred.

8. Exploration and Evaluation Assets (continued)

NAMG is the operator of the subject leases. NAMG has been unsuccessful in obtaining sufficient financing to proceed with further exploration and development of the properties. In light of this uncertainty and results to date on the other properties during fiscal 2015 the Company determined to record impairment charges of $122,154 on the Tejon Main Area and $318,121 on White Wolf.

The Lani Agreement also required the Company to advance US $300,000 to NAMG for working capital purposes. These advances are non-interest bearing and are repayable from production revenues or equity financing conducted by NAMG, whichever comes first. During fiscal 2014 the Company completed the advances to NAMG and was subsequently repaid US $193,390. Due to NAMG's financial situation, during fiscal 2015 the Company recorded a provision of $119,488 on the remaining outstanding balance.

(d) During fiscal 2010 the Company was informed by the government of Romania that it had been awarded four exploration blocks located in the Pannonian Basin, in western Romania. In May 2011 the Company signed petroleum concession agreements with the National Agency for Minerals and Hydrocarbons ("NAMR") the government agency in Romania which regulates the oil and gas industry.

The four concessions have specific mandatory work programs (the "Romania Work Programs"), which were estimated at US $56,630,000 for all four programs, to be completed over two years from final approval. Production from the concessions is also subject to royalties of between 3.5% to 13.5% based on quarterly gross production payable to the government.

On May 20, 2011 the Company and Naftna Industrija Srbije j.s.c. Novi Sad ("NIS"), an arm's length corporation, signed a memorandum of understanding to jointly explore the four exploration blocks in Romania. On October 27, 2011 the Company and NIS signed a farm-out agreement (the "Farm-out"). Under the terms of the Farm-out, NIS paid the Company $250,000 and agreed to pay a further $275,000 upon final concession approvals by the government of Romania and assignment of an 85% participation interest and operatorship of the Romania Work Programs to NIS. NIS has the obligation to fund the Romania Work Programs, including environmental work, 2D and 3D seismic acquisition and processing, and the drilling of 12 wells. The Company retains a 15% carried interest in each block through the obligatory two year Phase I work program and the optional one year Phase II work program. If a commercial discovery is made, the Company is responsible for its 15% interest in development of the commercial discovery.

During fiscal 2012 the Company received final concession approval by the government of Romania for one exploration block (EX-2 Tria) and the Company transferred the 85% participation interest in EX-2 Tria to NIS Petrol S.R.L ("NSI Petrol"), a wholly-owned subsidiary of NIS, and the Company received a pro-rated payment of $68,750 from NIS. On November 22, 2013 the Company received final concession approval on the three remaining exploration blocks. The Company subsequently transferred the 85% participation interest in the exploration blocks to NIS Petrol and received the final payment of $206,250 during fiscal 2014.

NAMR has granted NIS and the Company an extension of 2.5 years, until June 2017, to conduct the Phase I work program for the exploration block, EX-2 Tria.

(e) Effective November 28, 2011 the Company and the Office National des Hydrocarbures et des Mines ("ONHYM"), an agency of the Moroccan government, entered into agreements whereby the Company was granted an exploration permit (the "Exploration Permit") for a 75% participation interest in a prospective exploration block (the "Doukkala Block") situated along the Atlantic coast southwest from Casablanca, Morocco. The Exploration Permit had an overall duration of eight years, comprising :

(i) Phase 1 program under which the Company was committed to carry out a specified exploration work program, estimated to cost approximately US $5,500,000, over three years;

(ii) on completion of the Phase 1 program, the Company could elect to enter into an extension for a Phase 2 program under which, amongst other things, the Company would be committed to drill two wells, estimated to cost approximately US $14,000,000 over a two year duration; and

8. Exploration and Evaluation Assets (continued)

(iii) on completion of the Phase 2 program the Company could elect to enter into an extension for a Phase 3 program under which, amongst other things, the Company would be committed to acquire 3D seismic and drilling of one well, estimated to cost approximately US $14,000,000 over a three year duration.

ONHYM retained a 25% carried interest to declaration of commerciality on the Doukkala Block.

The Company had provided a US $3,500,000 guarantee (the "Guarantee") in favour of ONHYM as security for performance of the Phase 1 program. The Company had requested an extension from ONHYM for the time required to complete the Phase 1 work program. ONHYM did not consent to an extension and, as a result, it was unlikely that the Company would incur the full amount of the Phase 1 work program by the deadline. During fiscal 2014 the Company determined that its Guarantee was at risk of being called and the Company recorded a provision of $3,868,550 against the Guarantee.

On August 15, 2014 a demand was made by ONHYM for the release and payment of the Guarantee. On August 20, 2014 the guarantee amount was released to ONHYM. The joint venture with ONHYM is effectively terminated.

(f) Effective March 28, 2012 the Company (10% interest), Oil India Limited (40% interest), Oil and Natural Gas Corporation Limited (30% interest) and Gail (India) Limited (20% interest) (collectively the "Partners") and the government of India signed a production sharing contract (the "PSC") for Block AA-ONN-2010/2 (the "AA Block") located in the Assam-Arakan Basin of northeast India. Under the terms of the PSC work program commitment, the Partners was to acquire certain 3D seismic data and drill two wells, at an estimated cost to the Company of US $2.8 million, over a five year period. In January 2015 the petroleum exploration license for the AA Block was signed. In July 2015 the Company provided notice that it would be withdrawing from the PSC.

(a) On January 7, 2014 commercial discovery was declared on PEP 54877 and the capitalized expenditures were transferred from exploration and evaluation assets to property, plant and equipment. See also Note 8(a).

On February 8, 2014 the Company had recovered the Initial Funding on PEP 54877, after which all additional net revenues are being shared according to each party's interest.

(b) Effective September 1, 2010 the Company executed a purchase and sale agreement with Sphere Energy Corp. ("Sphere"), a private company, whereby the Company paid $1,125,000 to acquire Sphere's working interests, ranging from 4.12% to 20%, in four producing oil wells and fourteen gas wells (the "Carbon Property") located northeast of Calgary, Alberta.

(c) At March 31, 2015 the Company assessed the recoverability of its investment in petroleum and natural gas properties by performing impairment tests at the cash-generating unit levels. The recoverable amounts of each cash-generating unit were estimated based on the higher of the value in use and the fair value less costs to sell. The estimated fair value less costs to sell was used and was determined using estimated future cash flows based on estimated reserves, discounted at 10%. Based on the impairment tests, the carrying amount of the investment in petroleum and natural gas properties was determined to be impaired in the amount of $2,568,439. This amount was recognized in profit or loss for the year.

Foreign exchange movement	(6,620)	4,866
Balance, end of period	1,062,292	995,388

The total amount of estimated undiscounted cash flows required to settle the Company's estimated obligation is $1,190,800 (March 31, 2014 - $1,080,000) which has been discounted using a pre-tax risk-free rate of 3.5% and an inflation rate of 1.016%. The present value of the decommissioning liabilities may be subject to change based on management's current estimates, changes in remediation technology or changes to the applicable laws and regulations. Such changes will be recorded in the accounts of the Company as they occur.

The total future asset decommissioning obligations were estimated based on the Company's net ownership interest in all wells and facilities, the estimated costs to abandon and reclaim the wells and facilities and the estimated timing of the costs to be incurred in future years. These liabilities will be settled at various dates which are currently expected to extend up to 2024. Settlement of the liabilities is expected to be funded from general corporate funds at the time of retirement.

11. Share Capital

(a) *Authorized Share Capital*

The Company's authorized share capital consisted of an unlimited number of common shares without par value. All issued common shares are fully paid.

(b) *Reconciliation of Changes in Share Capital*

No equity financings were conducted by the Company during fiscal 2015 or fiscal 2014.

On February 3, 2014 the Company filed a normal course issuer bid (the "NCIB") which authorized the Company to repurchase for cancellation up to 8,882,872 common shares until February 2, 2015 or the date by which the Company had acquired the maximum number of common shares under the NCIB.

On February 3, 2015 the Company filed a renewal normal course issuer bid which authorizes the Company to repurchase for cancellation up to 8,725,822 common shares until February 2, 2016 or the date by which the Company has acquired the maximum number of common shares under the normal course issuer bid.

During fiscal 2015 the Company repurchased a total of 2,454,500 common shares for $371,803 cash consideration. The average cost of the common shares repurchased was $0.15 per share. The difference between the purchase price and the carrying value of the common shares was $720,535.

During fiscal 2014 the Company repurchased a total of 983,000 common shares for $299,443 cash consideration. The average cost of the common shares repurchased was $0.30 per share. The difference between the purchase price and the carrying value of the common shares was $150,868.

See also Note 19(a).

11. Share Capital (continued)

(c) *Warrants*

A summary of the number of common shares reserved pursuant to the Company's outstanding warrants at March 31, 2015 and 2014 and the changes for the periods ended on those dates, is as follows:

	Fiscal 2015		Fiscal 2014	
	Number	Weighted Average Exercise Price $	Number	Weighted Average Exercise Price $
Balance, beginning of period	-	-	11,685,000	0.34
Issued on exercise of compensation options	-	-	695,000	0.34
Exercised	-	-	(8,776,294)	0.34
Expired	-	-	(3,603,706)	0.34
Balance, end of period	-	-	-	-

(d) *Share Option Plan*

The Company has established a fixed share option plan (the "Plan"), in which a total of 12,408,697 common shares have been reserved for issuance under the Plan. The minimum exercise price of the share options is set at the Company's closing share price on the day before the grant date, less allowable discounts in accordance with the policies of the TSXV. Options granted may be subject to vesting provisions as determined by the Board of Directors and have a maximum term of ten years from the date of grant.

During fiscal 2015 the Company granted 5,308,000 share options and recorded compensation expense of $588,050 on the granting and vesting of share options.

During fiscal 2014 the Company granted 1,725,000 share options and recorded compensation expense of $435,288 on the granting and vesting of share options.

The fair value of share options granted and vested is estimated using the Black-Scholes option pricing model using the following assumptions:

	Fiscal 2015	Fiscal 2014
Risk-free interest rate	0.97% - 1.58%	1.00% - 1.28%
Estimated volatility	76% - 98%	60% - 111%
Expected life	1 year - 5 years	2 years - 5 years
Expected dividend yield	0%	0%
Estimated forfeiture rate	0%	0%

The weighted average grant date fair value of all share options granted and vested during fiscal 2015 was $0.11 and during fiscal 2014 was $0.25 per share option.

During fiscal 2015 the Company repriced share options previously granted to purchase 1,822,000 common shares, from original exercise prices ranging from $0.37 to $0.50 per share to a revised exercise price of $0.18 per share. The fair value of share options repriced has been estimated using the Black-Scholes option pricing model. The assumptions used were: risk-free interest rate 1.01% - 1.32%; estimated volatility 64% - 72%; expected life 0.5 year - 3.5 years; expected dividend yield 0%; and estimated forfeiture rate 0%. The value assigned to the re-pricing of the share options was $67,582.

11. Share Capital (continued)

During fiscal 2014 the Company repriced share options previously granted to purchase 1,400,000 common shares, from original exercise prices ranging from $0.83 to $1.16 per share to a revised exercise price of $0.40 per share. The fair value of share options repriced has been estimated using the Black-Scholes option pricing model. The assumptions used were: risk-free interest rate 1.00% - 1.04%; estimated volatility 61% - 74%; expected life 2.5 years - 2.9 years; expected dividend yield 0%; and estimated forfeiture rate 0%. The value assigned to the re-pricing of the share options was $84,000.

A summary of the Company's share options at March 31, 2015 and 2014 and the changes for the periods ended on those dates, is as follows:

	Fiscal 2015		Fiscal 2014	
	Number of Options Outstanding	Weighted Average Exercise Price $	Number of Options Outstanding	Weighted Average Exercise Price $
Balance, beginning of period	7,088,530	0.46	8,233,530	0.40
Granted	5,308,000	0.14	1,725,000	0.37
Exercised	-	-	(1,870,723)	0.17
Expired / Cancelled	(4,804,529)	0.34	-	-
Forfeited	(200,001)	0.37	(999,277)	0.34
Balance, end of period	7,392,000	0.16	7,088,530	0.46

The following table summarizes information about the share options outstanding and exercisable at March 31, 2015:

Number Outstanding	Number Exercisable	Exercise Price $	Expiry Date
150,000	150,000	0.18	April 11, 2015
250,000	250,000	0.50	October 1, 2015
360,000	360,000	0.18	October 1, 2015
570,000	570,000	0.18	February 2, 2016
80,000	80,000	0.18	March 14, 2016
12,000	12,000	0.40	April 6, 2016
12,000	12,000	0.18	April 6, 2016
650,000	433,333	0.18	April 4, 2018
300,000	100,000	0.175	October 3, 2019
108,000	36,000	0.18	October 3, 2019
4,900,000	4,900,000	0.14	November 14, 2019
7,392,000	6,903,333		

See also Note 19.

(e) *Compensation Options*

During fiscal 2010 the Company granted 731,000 compensation options, with each compensation option entitling the holder to purchase one unit for $0.25 per unit expiring on September 29, 2013. Upon exercise, each unit comprised one common share and one warrant to purchase an additional common share at a price of $0.34 per share on or before September 29, 2013.

During fiscal 2014, 695,000 compensation options were exercised for $173,750 and the remaining 36,000 compensation options expired on September 29, 2013 without exercise.

12. Related Party Disclosures

A number of key management personnel, or their related parties, hold positions in other entities that result in them having control or significant influence over the financial or operating policies of those entities. Certain of these entities transacted with the Company during the reporting period.

(a) *Transactions with Key Management Personnel*

The following amounts were incurred with respect to the Company's current President and Chairman, former President, current Chief Financial Officer ("CFO") and former Vice-President of Operations of the Company:

	Fiscal 2015 $	Fiscal 2014 $
Salaries	-	372,243
Professional fees	248,500	163,500
Health benefit premiums	-	13,656
Share-based compensation	308,383	276,767
	556,883	826,166

As at March 31, 2015, $nil (2014 - $3,500) remained unpaid and has been included in accounts payable and accrued liabilities.

(b) *Transactions with Other Related Parties*

(i) The following amounts were incurred with respect to other current and former non-management officers and directors of the Company:

	Fiscal 2015 $	Fiscal 2014 $
Professional fees	411,000	526,000
Legal	-	51,061
Share-based compensation	252,837	107,325
	663,837	684,386

As at March 31, 2015, $23,000 (2014 - $31,000) remained unpaid and has been included in accounts payable and accrued liabilities.

(ii) During fiscal 2015 the Company incurred a total of $60,550 (fiscal 2014 - $52,850) to Chase Management Ltd. ("Chase"), a private corporation owned by the CFO of the Company, for accounting and administration services provided by Chase personnel, excluding the CFO. As at March 31, 2015, $9,000 (2014 - $6,500) remained unpaid and has been included in accounts payable and accrued liabilities.

(iii) During fiscal 2014 the Company paid $3,153 to the spouse of the former President of the Company for professional services rendered.

(c) The Company previously had an agreement with a public company, Ava Resources Corp. ("Ava") which was related through a common director and officer, to share office premises. On March 31, 2014 Ava was dissolved. During fiscal 2015 the Company recorded the $16,533 rent deposit which was forfeited by Ava as a credit to general and administrative expenses.

(d) See also Note 6.

13. Income Tax

A reconciliation of taxes at statutory rates to the Company's effective tax expense is as follows:

	Fiscal 2015 $	Fiscal 2014 $
Loss before income taxes	(6,559,435)	(7,433,379)
Statutory tax rate	26%	26%
Expected income tax recovery	(1,705,000)	(1,933,000)
Permanent differences	220,000	202,000
Effect of change in tax rates in foreign exchange and other	(126,000)	(102,000)
Unrealized loss (gain) on investments	-	887,000
Reclamation bond forfeited	(1,006,000)	-
Losses expired	21,000	-
Change in deductible temporary differences	2,621,000	1,371,000
Deferred income tax	25,000	425,000

Unrecognized temporary differences:

	March 31, 2015 $	Expiry Thru (Year)	March 31, 2014 $
Allowable capital losses	149,000	N/A	-
Share issuance costs	21,000	2034	799,000
Investments	-	N/A	(220,000)
Tax losses	19,537,000	*	10,785,000
Other	1,986,000	N/A	719,000

* Tax losses of $3,667,000 in New Zealand carry forward indefinitely provided shareholder continuity is maintained. All other losses expire through 2035.

Deferred income tax assets have not been recognized in respect of these items because it is not probable that the Company will be able to generate sufficient taxable income upon which these deferred tax assets can be realized. Tax attributes are subject to review and potential adjustment by tax authorities.

14. Financial Instruments and Risk Management

The nature of the Company's operations expose the Company to credit risk, liquidity risk and market risk, and changes in commodity prices, foreign exchange rates and interest rates may have a material effect on cash flows, net income and comprehensive income.

This note provides information about the Company's exposure to each of the above risks as well as the Company's objectives, policies and processes for measuring and managing these risks.

The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and to monitor market conditions and the Company's activities. The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework and policies.

Credit Risk

Credit risk is the risk of financial loss to the Company if counterparties do not fulfill their contractual obligations. The most significant exposure to this risk is relative to the sale of oil production. All of the Company's production is sold directly to an oil super major. The Company is paid for its oil sales within 30 days of shipment. The Company has assessed the risk of non-collection from the buyer as low due to the buyer's financial condition.

14. Financial Instruments and Risk Management (continued)

Cash is held with a Canadian chartered bank and is monitored to ensure a stable return.

The carrying amount of cash, amounts receivable and advances receivable represents the maximum credit exposure. The Company does not have an allowance for doubtful accounts on its amounts receivable as at March 31, 2015 and did not provide for any doubtful accounts. The Company has recorded a provision of $119,488 on its deposits, as described in Note 8(c).

Commodity Price Risk

Commodity price risk is the risk that future cash flows will fluctuate as a result of changes in commodity prices, affecting results of operations and cash generated from operating activities. Such prices may also affect the value of exploration and development properties and the level of spending for future activities. Prices received by the Company for its production are largely beyond the Company's control as petroleum prices are impacted by world economic events that dictate the levels of supply and demand. All of the Company's oil production is sold at spot rates exposing the Company to the risk of price movements.

The Company did not have any commodity price contracts in place as at or during fiscal 2015 and 2014.

Liquidity Risk

Liquidity risk is the risk that the Company will not have the resources to meet its obligations as they fall due. The Company manages this risk by closely monitoring cash forecasts and managing resources to ensure that it will have sufficient liquidity to meet its obligations. All of the Company's financial liabilities are classified as current and are anticipated to mature within the next fiscal period. The following table is based on the contractual maturity dates of financial assets and the earliest date on which the Company can be required to settle financial liabilities.

	Contractual Maturity Analysis at March 31, 2015				
	Less than 3 Months $	3 - 12 Months $	1 - 5 Years $	Over 5 Years $	Total $
Cash	8,401,122	-	-	-	8,401,122
Amounts receivable	754,270	-	-	-	754,270
Advances receivable	-	209,270	-	-	209,270
Accounts payable and accrued liabilities	(562,212)	-	-	-	(562,212)

Market Risk

Market risk is the risk that changes in foreign exchange rates, commodity prices and interest rates will affect the Company's cash flows, net income and comprehensive income. The objective of market risk management is to manage and control market risk exposures within acceptable limits, while maximizing returns.

Foreign Currency Exchange Rate Risk

Foreign currency exchange rate risk is the risk that future cash flows, net income and comprehensive income will fluctuate as a result of changes in foreign exchange rates. All of the Company's petroleum sales are denominated in United States dollars and operational and capital activities related to the Company's properties are transacted primarily in New Zealand dollars and/or United States dollars with some costs also being incurred in Canadian dollars.

The Company currently does not have significant exposure to other currencies and this is not expected to change in the foreseeable future as the work commitments in New Zealand are expected to be carried out in New Zealand and to a lesser extent, in United States dollars.

14. Financial Instruments and Risk Management (continued)

Interest Rate Risk

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The Company is exposed to interest rate fluctuations on its cash which bears a floating rate of interest. The risk is not considered significant.

The Company did not have any interest rate swaps or financial contracts in place during fiscal 2015 and 2014 and any variations in interest rates would not have materially affected net income.

Fair Value of Financial Instruments

Financial instruments are classified into one of the following four categories: fair value through profit or loss ("FVTPL"); held-to-maturity investments; loans and receivables; and available-for-sale. The carrying values of the Company's financial instruments are classified into the following categories:

Financial Instrument	Category	March 31, 2015 $	March 31, 2014 $
Cash	FVTPL	8,401,122	12,273,810
Amounts receivable	Loans and receivables	754,270	1,872,614
Investment	Available-for-sale	-	718,445
Advances receivable	Loans and receivables	209,270	-
Accounts payable and accrued liabilities	Other liabilities	(562,212)	(3,278,683)
Due to joint venture partner	Other liabilities	-	(479,513)

The Company's financial instruments recorded at fair value require disclosure about how the fair value was determined based on significant levels of inputs described in the following hierarchy:

Level 1 - Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and value to provide pricing information on an ongoing basis.

Level 2 - Pricing inputs are other than quoted prices in active markets included in Level 1. Prices in Level 2 are either directly or indirectly observable as of the reporting date. Level 2 valuations are based on inputs including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the market place.

Level 3 - Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

The recorded amounts for amounts receivable, advances receivable, and accounts payable and accrued liabilities and amounts due to joint venture partner approximate their fair value due to their short-term nature. The fair value of cash and investment under the fair value hierarchy is measured using Level 1 inputs.

15. Capital Management

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition and exploration of petroleum and natural gas properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain development of the business. The Company defines capital that it manages as share capital. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

The Company's share capital is not subject to any external restrictions. The Company has not paid or declared any dividends since the date of incorporation, nor are any currently contemplated. There have been no changes to the Company's approach to capital management during the period.

16. Commitments

The Company has the following commitments for capital expenditures at March 31, 2015:

	Total $	Less than One Year $	More than One Year $
Operating leases	92,460	69,420	23,040
Other long-term obligations	2,715,280	1,747,140	968,140
Total contractual obligations	2,807,740	1,816,560	991,180

Effective August 1, 2011 the Company entered into an operating lease, expiring July 31, 2016, for the rental of an office in Vancouver, BC with a gross monthly lease payment of $5,760.

See also Note 8.

17. Supplemental Cash Flow Information

Non-cash activities were conducted by the Company as follows:

	Fiscal 2015 $	Fiscal 2014 $
Investing activities		
Deposits applied against expenditures	-	818,794
Expenditures on property, plant and equipment	112,133	(6,401,100)
Expenditures on exploration and evaluation assets	807,378	3,306,165
Initial estimated decommissioning liabilities	-	761,529
	919,511	(1,514,612)
Operating activities		
Provision for decommissioning liabilities	44,931	119,163
(Decrease) increase in accounts payable and accrued liabilities	(964,442)	1,395,449
	(919,511)	1,514,612

17. Supplemental Cash Flow Information (continued)

	Fiscal 2015 $	Fiscal 2014 $
Financing activities		
Issuance of common shares	-	501,938
Share-based payments received	-	(501,938)
	-	-

18. Segmented Information

The Company currently operates in one business segment, being the acquisition, exploration and production of oil and gas properties.

	As at March 31, 2015		
	Canada $	New Zealand $	Total $
Revenues	157,322	6,389,855	6,547,177
Exploration and evaluation assets	-	5,835,112	5,835,112
Property, plant and equipment	391,774	3,815,983	4,207,757

	As at March 31, 2014			
	Canada $	United States $	New Zealand $	Total $
Revenues	234,689	-	4,007,147	4,241,836
Exploration and evaluation assets	-	440,275	5,666,415	6,106,690
Property, plant and equipment	550,787	-	7,405,631	7,956,418

19. Events after the Reporting Period

(a) Subsequent to March 31, 2015 the Company repurchased 139,000 common shares of the Company under its NCIB for $21,025.

(b) On April 11, 2015 share options to purchase 150,000 common shares of the Company expired without exercise.

(c) On April 8, 2015 the Company repriced share options previously granted to purchase a total of 1,930,000 common shares, from an original exercise price of $0.18 per share to a revised exercise price of $0.14 per share.

(d) On April 9, 2015 the Company purchased 3,900,000 common shares of North South Petroleum Corp. ("North South") for $195,000 pursuant to a non-brokered private placement conducted by North South. On closing of the private placement the Company owned approximately 16.74% of the issued and outstanding common shares of North South and a director of the Company was appointed a director of North South. On May 22, 2015 another director of the Company was also appointed as a director of North South. North South is a public company trading on the NEX board of the TSXV. In addition the Company has purchased a further 80,000 common shares of North South through the public market for a total consideration of $20,430.
