EAST WEST PETROLEUM CORP.
NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
FOR THE SIX MONTHS ENDED JUNE 30, 2012
(Expressed in Canadian Dollars)

1. Nature of Operations

East West Petroleum Corp. (the “Company”) was incorporated on October 23, 1987 under the provisions of the Company Act (British Columbia). The Company is listed and trades on the TSX Venture Exchange (“TSXV”) under the symbol “EW”. The Company’s principal office is located at #1210 - 1095 West Pender Street, Vancouver, British Columbia V6E 2M6 Canada.

The Company carries on business in one operating segment, being the acquisition of, exploration for and production from petroleum and natural gas properties. Management considers that the Company has adequate resources to maintain its core operations and planned exploration programs for the next twelve months. However, the Company recognizes that exploration expenditures may change with ongoing results and, as a result, it may be required to obtain additional financing. While the Company has been successful in securing financings in the past, there can be no assurance that it will be able to do so in the future.

2. Basis of Preparation

These condensed consolidated interim financial statements have been prepared using accounting policies consistent with International Financial Reporting Standards (“IFRS”), and in accordance with International Accounting Standards (“IAS”) 34, *Interim Financial Reporting*, as issued by the International Accounting Standards Board (“IASB”). These condensed consolidated interim financial statements should be read in conjunction with the audited consolidated financial statements for the year ended December 31, 2011, which have been prepared in accordance with IFRS as issued by the IASB. The accounting policies followed in these condensed consolidated interim financial statements are consistent with those applied in the Company’s consolidated financial statements for the year ended December 31, 2011.

For other assets, impairment losses recognized in prior years are assessed at each reporting date for indications that previously recognized impairment losses may no longer exist or may have decreased. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. The impairment loss is reversed only to the extent that the asset’s or CGU’s carrying amount does not exceed the carrying amount that would have been determined, net of depletion, had no impairment loss been recognized in prior years. An impairment loss in respect of goodwill is not reversed.

Certain comparative figures have been reclassified to conform to the presentation used in the current period.

- (a) Effective November 28, 2011 the Company and the Office National des Hydrocarbures et des Mines (“ONHYM”), an agency of the Moroccan government, entered into agreements whereby the Company has been granted an exploration permit (the “Exploration Permit”) to earn a 75% participation interest in a prospective exploration block (the “Doukkala Block”) situated along the Atlantic coast southwest from Casablanca, Morocco. The Exploration Permit has an overall duration of eight years, comprising :
- (i) Phase 1 program under which the Company is committed to carry out a specified exploration work program, estimated to cost approximately US \$5,500,000, over three years;
 - (ii) on completion of the Phase 1 program, the Company can elect to enter into an extension for a Phase 2 program under which, amongst other things, the Company will be committed to drill two wells, estimated to cost approximately US \$14,000,000 over a two year duration; and
 - (iii) on completion of the Phase 2 program the Company can elect to enter into an extension for a Phase 3 program under which, amongst other things, the Company will be committed to acquire 3D seismic and drilling of one well, estimated to cost approximately US \$14,000,000 over a three year duration.

ONHYM retains a 25% carried interest to declaration of commerciality on the Doukkala Block.

The Company has provided a US \$3,500,000 (Cdn \$3,566,850) guarantee in favour of ONHYM as security for performance of the Phase 1 program. The amount is deposited in a savings account with a major Canadian bank. As the Company implements its work programs the guarantee will be reduced.

There is a gross royalty of 10% on crude oil and 5% on natural gas on production in excess of certain thresholds from the Doukkala Block, which would be payable to the Moroccan government. In addition, the Moroccan government is also entitled to certain bonuses based on daily production targets to a total of US \$9,000,000.

- (b) During fiscal 2010 the Company was informed by the government of Romania that it had been awarded four exploration blocks located in the Pannonian Basin, in western Romania. In May 2011 the Company signed petroleum concession agreements with government agencies in Romania which regulate the oil and gas industry, however the agreements have yet to be ratified by all authorities.

The four concessions have specific mandatory work programs (the “Romania Work Programs”), currently estimated at US \$56,630,000 for all four programs, to be completed over two years. The concessions are also subject to royalties of between 3.5% to 13.5% based on quarterly gross production payable to the government.

On May 20, 2011 the Company and Naftna Industrija Srbije j.s.c. Novi Sad (“NIS”), an arm’s length corporation, signed a memorandum of understanding (“MOU”) to jointly explore the four exploration blocks in Romania. Under the terms of the MOU, NIS paid the Company \$250,000 and will pay a further \$275,000 upon final concession approvals by the government of Romania and assignment of an 85% participation interest and operatorship of the Romania Work Programs to NIS. NIS will also fully fund the Romania Work Programs including environmental work, 2D and 3D seismic acquisition and processing, and the drilling of 12 wells to earn an 85% participation interest. The Company retains a 15% carried interest in each block until the achievement of commercial production, at which time the Company will then be responsible for its 15% interest. During fiscal 2011 the Company recorded a gain of \$218,879 resulting from the application of the \$250,000 against capitalized costs.

5. Exploration and Evaluation Assets (continued)

- (c) Effective March 28, 2012 the Company (10% interest), Oil India Limited (40% interest), Oil and Natural Gas Corporation Limited (30% interest) and Gail (India) Limited (20% interest) (collectively the “Partners”) and the government of India signed a production sharing contract (the “PSC”) for Block AA-ONN-2010/2 (the “AA Block”) located in the Assam-Arakan Basin of northeast India. Under the terms of the PSC work program commitment, the Partners will acquire certain 3D seismic data and drill two wells, at an estimated cost to the Company of US \$2.8 million.
- (d) Exploration and evaluation assets are tested for impairment when classified to property, plant and equipment within petroleum and natural gas interests, and also if facts and circumstances suggest that the carrying value exceeds the recoverable amount. As at June 30, 2012 the Company had no amounts capitalized to exploration and evaluation assets.

The total amount of estimated cash flows required to settle the Company's estimated obligation is \$97,386 which has been discounted using pre-tax risk-free rates of between 1.21% to 2.82%. The decommissioning liabilities relate to the Carbon Property in Canada. The present value of the decommissioning liabilities may be subject to change based on management's current estimates, changes in remediation technology or changes to the applicable laws and regulations. Such changes will be recorded in the accounts of the Company as they occur.

The total future asset decommissioning obligations were estimated based on the Company's net ownership interest in all wells and facilities, the estimated costs to abandon and reclaim the wells and facilities and the estimated timing of the costs to be incurred in future years. These liabilities will be settled at the end of the useful lives of the underlying assets which are currently expected to extend up to 48 years. Settlement of the liabilities is expected to be funded from general corporate funds at the time of retirement.

8. Share Capital

8. Share Capital (continued)

On October 11, 2011 the Company filed a normal course issuer bid (the "Normal Course Issuer Bid"), which authorized the Company to repurchase for cancellation for up to 7,995,189 common shares until October 13, 2012 or the date by which the Company has acquired the maximum number of common shares under the bid. As at June 30, 2012 the Company has purchased 759,000 common shares, which have not yet been cancelled, for \$323,894 cash consideration. The average carrying value of the common shares was \$0.43 per share. The difference between the purchase price and the carrying value of the common shares was \$55,144. See also Note 14 (a).

(c) *Warrants*

A summary of the number of common shares reserved pursuant to the Company's outstanding warrants at June 30, 2012 and 2011 and the changes for the six months ended on those dates is as follows:

	2012		2011

The following table summarizes information about the number of common shares reserved pursuant to the Company's warrants outstanding and exercisable at June 30, 2012:

Number	Exercise Price \$	Expiry Date
14,420,595	1.75	December 22, 2012
<u>11,685,000</u>	0.34	September 29, 2013
<u>26,105,595</u>		

(d) *Share Option Plan*

The Company has established a rolling share option plan (the "Plan"), in which the maximum number of common shares which can be reserved for issuance under the Plan is 10% of the issued and outstanding shares of the Company. The minimum exercise price of the share options is set at the Company's closing share price on the day before the grant date, less allowable discounts in accordance with the policies of the TSXV. Options granted may be subject to vesting provisions as determined by the Board of Directors and have a maximum term of ten years from the date of grant.

During the six months ended June 30, 2012 the Company granted 300,000 (2011 - 3,126,000) share options to its directors, employees and consultants and recorded compensation expense of \$354,689 (2011 - \$2,444,496) on the granting and vesting of share options.

During the six months ended June 30, 2012 the Company repriced stock options previously granted to purchase 686,000 common shares, from original exercise prices ranging from \$0.87 to \$1.16 per share to a revised exercise price of \$0.40 per share. The fair value of the repriced stock options have been estimated using the Black-Scholes option pricing model. The assumptions used were: risk-free interest rate 1.21% - 1.47%; estimated volatility 106% - 124%; expected life 2 years - 4 years; expected dividend yield 0%; and estimated forfeiture rate 0%. The value assigned to the re-pricing of the stock options was \$34,220.

The weighted average grant date fair value of all share options granted and vested during the six months ended June 30, 2012 to the Company's directors, employees and consultants was \$0.20 (2011 - \$0.65) per share option.

Option-pricing models require the use of estimates and assumptions including the expected volatility. Changes in the underlying assumptions can materially affect the fair value estimates and, therefore, existing models do not necessarily provide reliable measure of the fair value of the Company's share options.

A summary of the Company's share options at June 30, 2012 and 2011 and the changes for the six months ended on those dates, is as follows:

	<u>2012</u>		<u>2011</u>

10. Financial Instruments and Risk Management

Categories of Financial Assets and Financial Liabilities

Financial instruments are classified into one of the following four categories: fair value through profit or loss (“FVTPL”); held-to-maturity investments; loans and receivables; and available-for-sale. The carrying values of the Company’s financial instruments are classified into the following categories:

Financial Instrument	Category	June 30, 2012 \$	December 31, 2011 \$
Cash	FVTPL	24,299,739	25,601,140
Amounts receivable	Loans and receivables	99,089	62,794
Restricted cash	FVTPL	3,566,850	3,561,442
Accounts payable and accrued liabilities	Other liabilities	(135,072)	(222,778)

The Company’s financial instruments recorded at fair value require disclosure about how the fair value was determined based on significant levels of inputs described in the following hierarchy:

Level 1 - Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and value to provide pricing information on an ongoing basis.

Level 2 - Pricing inputs are other than quoted prices in active markets included in Level 1. Prices in Level 2 are either directly or indirectly observable as of the reporting date. Level 2 valuations are based on inputs including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the market place.

Level 3 - Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

10. Financial Instruments and Risk Management (continued)

The recorded amounts for amounts receivable and accounts payable and accrued liabilities approximate their fair value due to their short-term nature. The recorded amount for the deposit approximates its fair value. The fair value of cash and restricted cash under the fair value hierarchy is measured using Level 1 inputs.

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit Risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash, restricted cash and amounts receivable. Management believes that the credit risk concentration with respect to financial instruments included in cash and restricted cash is remote.

The Company is not the operator of certain petroleum and natural gas properties in which it has an ownership interest. The Company is dependent on such operators for the timing of activities related to such properties and will largely be unable to direct or control the activities of the operators. In addition, the Company's activities may be impacted by the ability, expertise, judgement and financial capability of the operators.

Commodity Price Risk

Commodity prices for petroleum and natural gas are impacted by global economic events that dictate the levels of supply and demand, as well as the relationship between the Canadian dollar and the US dollar. Significant changes in commodity prices may materially impact the Company's ability to raise capital. The Company does not have any financial risk management contracts in place at June 30, 2012 to manage these risks.

Liquidity Risk

Liquidity risk is the risk that the Company will not have the resources to meet its obligations as they fall due. The Company manages this risk by closely monitoring cash forecasts and managing resources to ensure that it will have sufficient liquidity to meet its obligations. All of the Company's financial liabilities are classified as current and are anticipated to mature within the next fiscal period. The following table is based on the contractual maturity dates of financial assets and the earliest date on which the Company can be required to settle financial liabilities.

	Contractual Maturity Analysis at June 30, 2012				
	Less than 3 Months \$	3 - 12 Months \$	1 - 5 Years \$	Over 5 Years \$	Total \$

10. Financial Instruments and Risk Management (continued)

Market Risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. These fluctuations may be significant.

(a) Interest Rate Risk

The Company is exposed to interest rate risk to the extent that the cash bears floating rates of interest. The interest rate risk on cash and on the Company's obligations are not considered significant.

(b) Foreign Currency Risk

The Company maintains cash deposits in US Dollars with its Canadian bank and conducts activities denominated in US dollars. As such, the fluctuation of the Canadian Dollar in relation to the US Dollar will have an impact upon the operations of the Company and may also affect the value of the Company's assets and the amount of shareholders' equity. The Company has not entered into any agreements or purchased any instruments to hedge possible currency risks. At June 30, 2012, 1 Canadian Dollar was equal to 0.98 US Dollar.

Balances are as follows:

	US Dollar	Canadian Dollar Equivalent
Cash	1,213,088	1,237,845
Restricted cash	3,500,000	3,566,850
Accounts payable and accrued liabilities	<u>(60,223)</u>	<u>(61,452)</u>
	<u>4,652,865</u>	<u>4,743,243</u>

Based on the net exposures as of June 30, 2012 and assuming that all other variables remain constant, a 10% fluctuation on the Canadian Dollar against the US Dollar would result in the Company's net loss being approximately \$427,000 higher (or lower).

Capital Management

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition and exploration of petroleum and natural gas properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain development of the business. The Company defines capital that it manages as share capital. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

11. Commitments

- (a) Effective August 1, 2011, the Company entered into an operating lease, expiring July 31, 2016, for the rental of an office in Vancouver, BC with a gross monthly lease payment of \$5,511. The Company has entered into a sub-lease with a public company, which is related through common directors and officers, whereby the Company will be reimbursed \$2,755 per month. During the six months ended June 30, 2012 the Company received \$16,530 from the public company for shared premises.

11. Commitments (continued)

- (b) The Company and Greg Renwick have entered into an executive agreement whereby Mr. Renwick provides his services as the President and Chief Executive officer of the Company. Under the agreement the Company is currently paying Mr. Renwick a base salary of US \$250,000 per annum. The agreement expires on September 30, 2013.

The agreement provides that, in the event Mr. Renwick's services are terminated, a severance payment of six months of compensation is payable.

12. Supplemental Cash Flow Information

During the six months ended June 30, 2012 and 2011 non-cash activities were conducted by the Company as follows:

	2012 \$	2011 \$
Investing activity		
Expenditures on property, plant and equipment	<u>(1,165)</u>	<u>(14,941)</u>
Operating activity		
Provision for decommissioning liabilities	<u>1,165</u>	<u>14,941</u>

13. Segmented Information

The Company currently operates in one business segment, being the acquisition, exploration and production of oil and gas properties. The Company's main oil and gas operations and corporate assets are located in Canada.

14. Subsequent Events

- (a) Subsequent to June 30, 2012 the Company repurchased an additional 59,000 common shares under its Normal Course Issuer Bid for \$19,658 cash consideration.
- (b) In July 2012 the Company extended the expiry dates:
 - (i) on 36,000 share options with an exercise price of \$0.40 per share expiring on April 6, 2014 to a revised expiry date of April 6, 2016; and
 - (ii) on 1,160,000 share options with an exercise price of \$0.83 per share expiring on May 31, 2014 to a revised expiry date of May 31, 2016.

All other terms of the options remained the same.

- (c) On July 5, 2012 the Company received disinterested shareholder approval to amend the terms of 1,040,000 share options previously granted to a director of the Company, whereby the exercise price of the share options was reduced from \$1.16 per share to \$0.40 per share. Other than the imposition of certain trading restrictions, all other terms of the options remained the same.
